Cloning the PNR	7

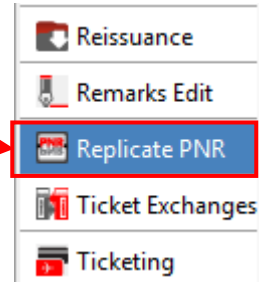

Introduction

Replicate PNR is an app for travel consultant to replicate PNR quickly without using the cryptic command. It gives options for user to select fields to be clone easy via check boxes available in Replicate PNR App.

This user guide shows you the Replicate PNR procedure by using the app and provides some tips.

Launching the Replicate PNR App

Click on **[Replicate PNR]** at the side bar to launch the App

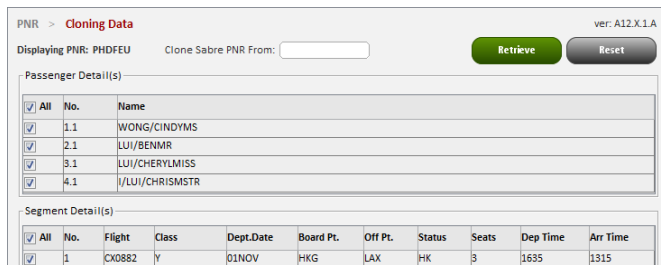

Tips:

You may retrieve the PNR before launching the App or launch the App first and input the Record Locator directly in the App to retrieve the PNR.

A. If no PNR retrieve in the working area

⇒ Input the record locator directly in the field provided and click on **[Send]** button, the PNR's information will be auto-populated into the "Cloning Data" page.

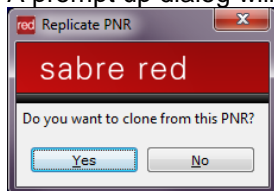

⇒ **[Reset]** button – to clear the record locator in the "Clone Sabre PNR From" field.

⇒ **[Quit]** button – to close and exist the App.

B. If the PNR already retrieved in the working area

i. A prompt up dialog will be displayed

⇒ **[Yes]** – retrieve the PNR's data and auto-populated into the "Cloning Data" page.

⇒ **[No]** – Direct to the "PNR" page to input other record locator.

ii. The retrieved PNR data will be shown in “Cloning Data” field.
