

## OVERVIEW

**Flight Data Transfer** is a Red App that assists you when creating SSRs (Special Service Requests) to transmit Secure Flight data to airlines in the PNR itinerary. It operates by reading Secure Flight data Stored in STARS customer profile. Data must be stored in STARS in a specific format. The app can help you create the data in the specified format.

 FI=Female Infant, MI=Male Infant

Redress number:   
 If adding Redress number for infant  
 enter name number of associated adult:   
 Country of issue:

Known Traveler Nmbr:  Country of issue:

Enter X to add Secure Flight data to STAR:

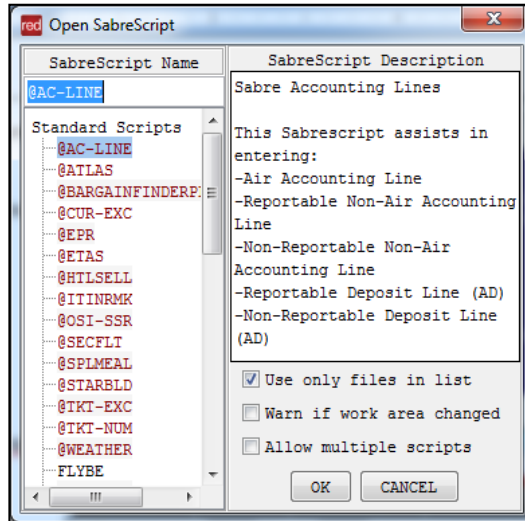

---

**TASK****GRAPHIC**

---

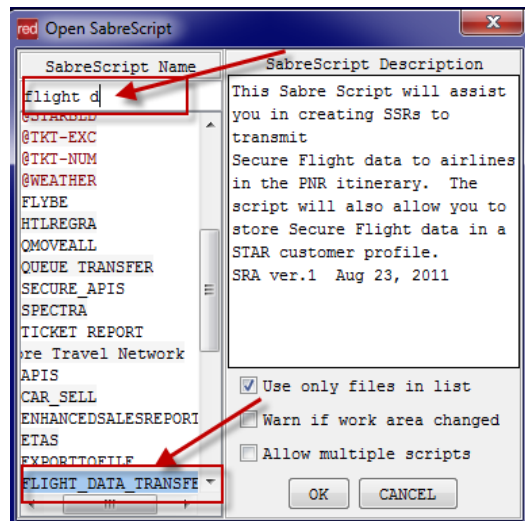

To use the **PNR Clone Red App**, follow these steps:

Press **CTRL + A** to launch the SabreScript Window

Type the SabreScript Name or use the scroll down bar until you find the script name **Flight Data Transfer**.

Click **OK** to launch it.

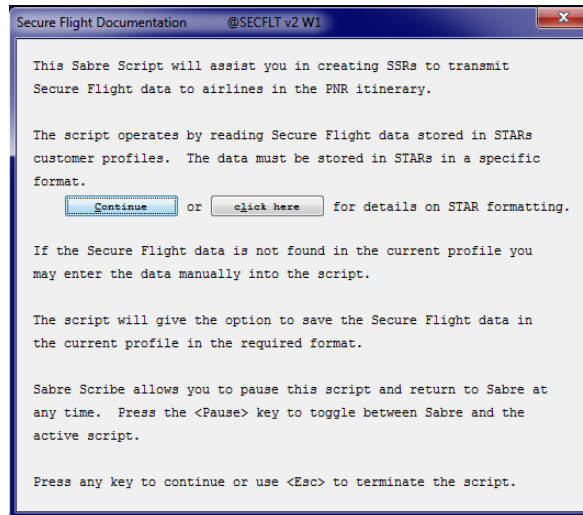

---

**TASK****GRAPHIC**

---

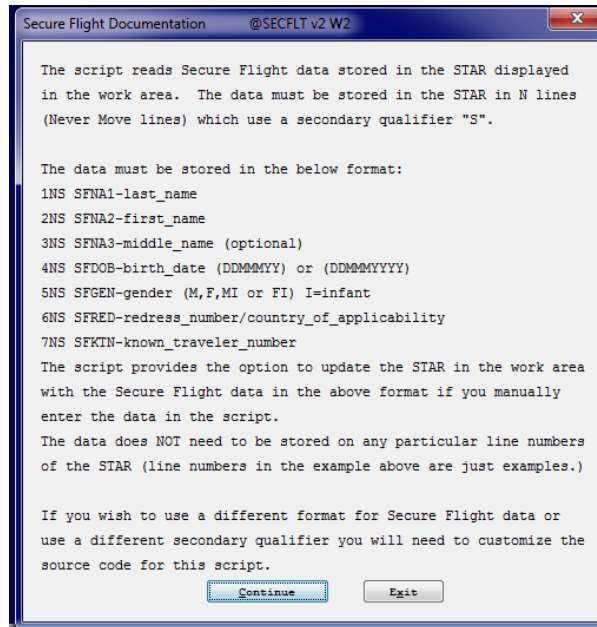

A warning window will pop up. Follow the instructions to continue.

Click **Continue** to proceed or **Click here** to see details on how to create the STAR in the specified required format.

If the **Click here** button was chosen, the following screen will appear.

Click on **Continue** to proceed or Click on the **Exit** button to close the application.

**TASK**

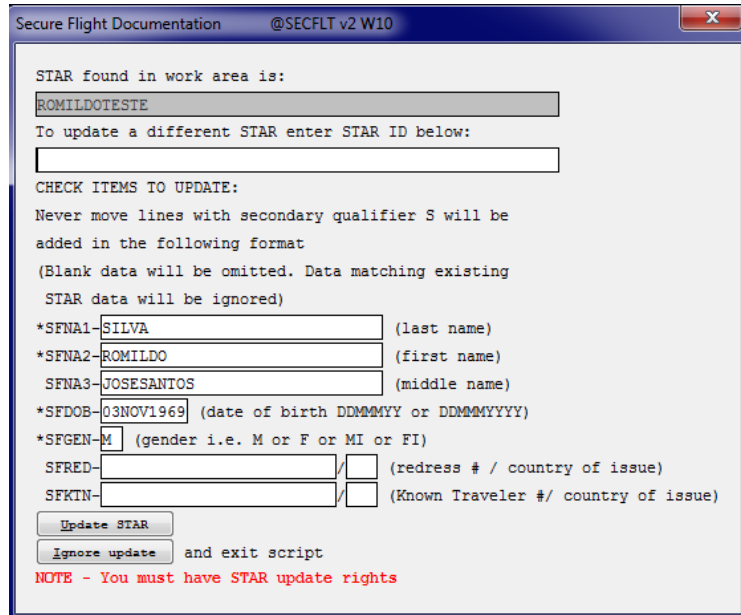

**GRAPHIC**

Click on **Add Secure Flight data to Start only (PNR not required)**, if you only want to update the STAR.

Click on **Add Secure Flight SSRs to PNR (with option to add to STAR)**, if you want to transfer the information to the PNRs as well as add the information to the STAR.

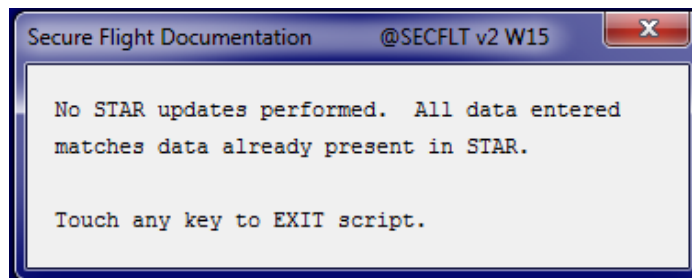

IF **Add Secure Flight data to Start only (PNR not required)** was chosen, the following screen will appear. Fill in the required information and click on **Update STAR**.

Click on **Ignore Update** to exit the application.

If you try to insert information that is already existent in the STAR, the following pop up window message will appear.

Press any key to close the application.

IF **Add Secure Flight SSRs to PNR (with option to add to STAR)** was chosen and you do not have an active PNR in Sabre Red Workspace, the following pop-up window message will appear.

Press any key to close the application, retrieve a PNR and run the Red App again.

**TASK**

**GRAPHIC**

When you have an active PNR, the following screen will appear.

Follow the window instructions to fill it out. You can type over the existing information if needed..

When finished, click **ENTER** to proceed.

How to validate if a Red App is already installed in my Sabre Red Workspace?

To validate that the user received the application before restarting Sabre Red Workspace, click Help and then History of Updates to look for Red Apps with a Status of Not Yet Activated.

Name	Version	Date	Status
Sabre Red Workspace_3YAB_3333 (Pr...	2.0.0.0000000007	Sep 20, 2012 5:08:29 PM	NOT YET ACTIVATED
Air Routing Mileage Calc	1.0.0.201201161659	Sep 20, 2012 5:08:29 PM	NOT YET ACTIVATED
Calculator	1.0.0.201112201654	Sep 20, 2012 5:08:29 PM	NOT YET ACTIVATED

1. After restarting Sabre Red Workspace, you can also look under **Contact Us – Application Vendor Support** to validate that the application installed successfully.

2. The system will open a new window with all the Red Apps installed.

Should you need to contact the Red App Vendor for support, click on the Red App name to open the **Contact Details**.
