

Historical Pricing Red App

OVERVIEW

The Historical Pricing Red App gives you the ability to find a fare with past date segments and past ticketing date with or without a PNR.

- You may add flight number, ticketing date with year and travel date with year in the application to view a historical price.
- You may also price an itinerary with flown segments (partial or totally flown), providing original ticketing date.
 - This allows you get a fare difference in a scenario where, for example, the outbound is flown and there is a change in the reservation booking designator (RBD) on the inbound flight.
- You may display a PNR and the app automatically enters the segment data into the search.
 - This allows you to easily capture prices for past date bookings without the need to recreate the itinerary in the Sabre system.

As the process requires less manual work, it streamlines your processes, and gives you the option to store and keep those fares in an excel document.

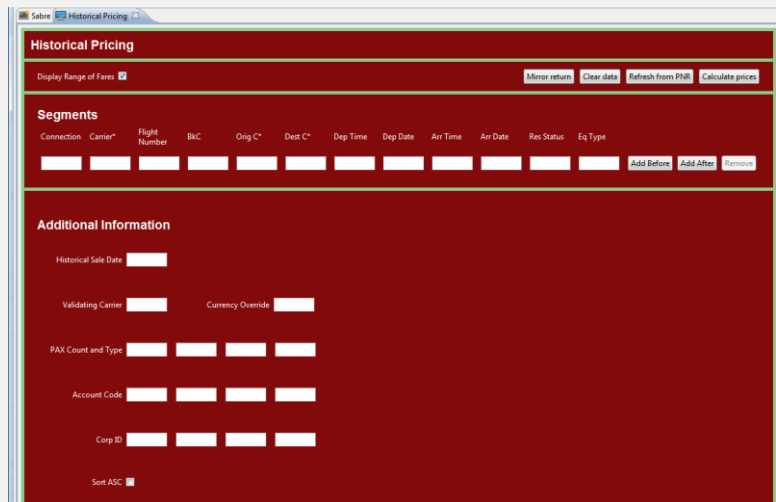

ACCESS HISTORICAL PRICING APP

From your *Sabre Red Workspace* screen:

- Click **Tools, Air, Historical Pricing**.

The Historical Pricing app search screen displays.

To close the application, **click the X** on the Historical Pricing tab.

BASIC HISTORICAL PRICING SEARCH

Use this method when you do **not** have all of the flight data, (flight number, booking code, departure time, etc.), or an existing PNR.

1. **Keep** the check mark in **Display Range of Fares**.
2. In **Segments**, enter applicable **Carrier**, **Origin city/airport (Orig C)**, and **destination city/airport (Dest C)**.
 - An asterisk (*) indicates mandatory fields.
 - You may add additional information if you wish.
3. In **Additional Information**, enter the **Historical Sale Date** (including 2-digit year).
 - You may add additional information if you wish.
4. Click **Calculate prices**.

The list of historical prices displays.

5. Click **one of the fares** to display the fare details.

Option	Fare Basis Code	BkgCode	Fare	Taxes	Total
1	C3FFWFR	C	520.00 GBP	34.10 GBP	554.10 GBP
2	D3FFWFR	D	438.00 GBP	34.10 GBP	472.11 GBP
3	I3FFWFR	I	356.00 GBP	34.10 GBP	390.11 GBP
4	M3FFWFR	M	356.00 GBP	25.61 GBP	381.61 GBP

ADDITIONAL FUNCTIONS

You may use any of the buttons in the top right corner.

- **Mirror return** – Use the existing segment information and mirror it for a return segment.
- **Clear data** – Clear the data from the search screen.
- **Refresh from PNR** – Add segment data from a displayed PNR.
- **Calculate prices** – ask the app to find the historical prices.

Mirror return

Clear data

Refresh from PNR

Calculate prices

In the **Segments** section you may use the buttons:

- **Add Before** – Add an additional segment before any existing segment requests.
- **Add After** – Add an additional segment after any existing segment requests
 - In both cases, another segment line displays where you can enter additional data.
- **Remove** - Remove the segment line.

Add Before

Add After

Remove

In the **Additional Information** section you can:

- (Mandatory) Enter a **Historical Sale Date** for your search.
 - Date **must** include 2-digit year
- Enter a **Validating Carrier** to verify any pricing validation requirements.
- Enter a **Currency Override** to display the price in a specific currency.
- Enter a passenger count and passenger type in **PAX Count and Type** to verify price based on passenger types.
 - This field is **mandatory** when you remove the check mark from Display Range of Fares.
 - In this scenario, you **must** enter at least 1 passenger and passenger type, for example, 1ADT.
- Enter applicable **Account Code** or Corporate IDs (**Corp ID**) which may affect pricing.
- Click **Sort ASC** (sort ascending) to sort the fares from lowest to highest.
 - Default is descending, highest to lowest.
